V4_15/8/2023

Congratulations on your purchase

And welcome to our growing gang of savvy shoppers

We're on a mission to bring you extraordinary bathroom products, for less. From modern to traditional style ceramics, plus the gorgeous fixtures, fittings and furniture to match. So, you can fall in love with your space every single day.

As one of the UK's largest independent bathroom stores, we've received countless awards; including the National Business Awards UK, the Digital Entrepreneur Awards and being placed on The Sunday Times Fast Track 100.

We hope your new product goes above and beyond your expectations. However, should any problems occur, please:

- log in to your account and contact our customer services team via your self-serve portal – betterbathrooms.com/CustomerAccount/Login
- contact us via betterbathrooms.com/content/contact-us

Important information

- Please read these instructions thoroughly and retain for future reference
- Installation must be carried out in compliance with The Water Fittings Regulations and Scottish Water Byelaws.
- The system must be flushed prior to installation
- Minimum and Maximum working pressure : 1 - 5 bar
- Pressures must be equal for optimum performance
- Please do not connect hot and cold water supply lines in reverse. This could result in hot water flowing from cold line and cause scalding.
- The feed-water temperature of water shall not exceed 85°C.
Exceeding 85° may cause scalding, the service life of faucets might be shortened, or the faucet might be damaged.
- After installation, please make sure the faucet is securely mounted and checked for leaks.

Parts / Diagrams

Round Mini Cloakroom Basin Mixer Tap		
	No	Description
	1	Handle assembled
	2	Dome
	3	Locknut
	4	Cartridge
	5	Body assembled
	6	Aerator with housing
	7	Rubber washer
	8	Gasket
	9	Leg
	10	Locknut
	11	Screw
	12	Flexible hose

Round Mono Basin Mixer Tap		
	No	Description
	1	Handle assembled
	2	Dome with locknut
	3	Cartridge
	4	Body assembled
	5	Aerator with housing

	8	Leg
	9	Locknut
	10	Screw
	11	Flexible hose

Round Mono High Rise Basin Mixer Tap

No	Description
1	Handle assembled
2	Dome with locknut
3	Cartridge
4	Body assembled
5	Aerator with housing
6	Rubber washer
7	Gasket
8	Leg
9	Locknut
10	Screw
11	Flexible hose

Dimensions

Tools required

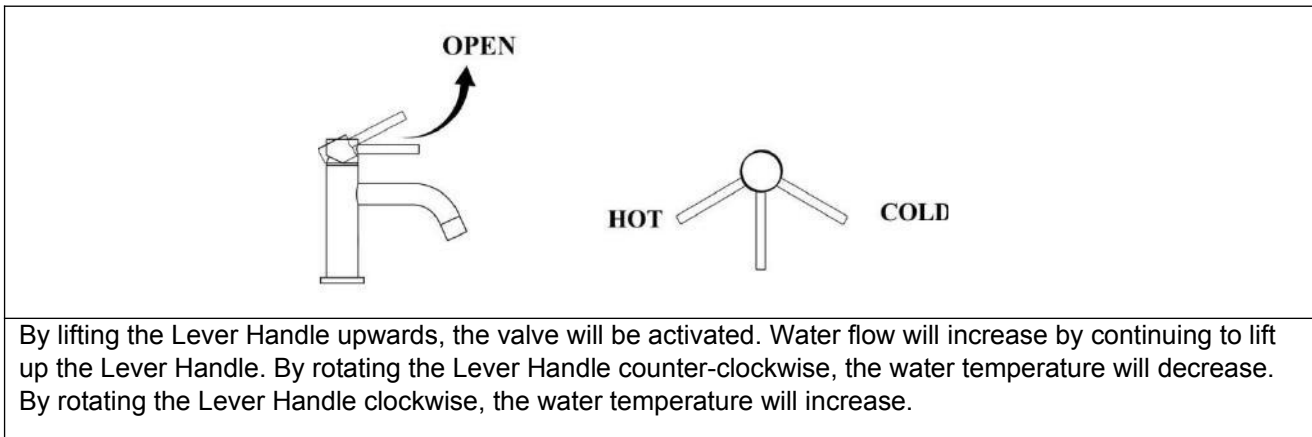

- Screwdriver

Installation

	<p>Install the flexible hoses with inlets in the body (if the hoses were not pre-assembled).</p> <p>Remove the Screws, Locknut, Metal gasket, Rubber Washer from the mixer body .</p> <p>The flexible hoses are pre-assembled with the body from the factory.</p>
	<p>Ensure the o-ring is fitted between the base and basin/top.</p> <p>From above basin, push the inlet hoses through the hole on basin and position correctly.</p> <p>Do not allow the hoses to be kinked or twisted</p>
	<p>From underneath basin, secure mixer body by placing Rubber Washer, Metal gasket onto the leg, followed by fixing Locknut and screws.</p> <p>Tighten the Locknut and screws by screwdriver until mixer is secure, do not overtighten as this could crack the ceramic</p>
<p>Correct installation way</p>	<p>When tightening the locknut, ensure the screws are in the same level.</p> <p>Do not allow the locknut to be installed in inclined state.</p>

Operation

Troubleshooting

Important information

- Please read these instructions thoroughly and retain for future reference
- Installation must be carried out in compliance with The Water Fittings Regulations and Scottish Water Byelaws.
- The system must be flushed prior to installation, else it might clog the filter and the following phenomenon occurs: discharged water volume is small, or temperature cannot be controlled well.
- Pressures must be equal for optimum performance
- Please do not connect hot and cold water supply lines in reverse. This could result in hot water flowing from cold line and cause scalding.
- The feed-water temperature of water shall not exceed 85°C. Exceeding 85°C may cause scalding, the service life of faucets might be shortened, or the faucet might be damaged.
- After installation, please make sure the faucet is securely mounted and checked for leaks.

Parts / Diagrams

	No	Part Description
	1	Sealing washer
	2	Vertical tube
	3	Flange
	4	Flange
	5	Body
	6	O-ring
	7	Nut
	8	Horizontal tube
	9	Flange

Dimensions

Tools required

- Seal tape

Installation

	<ul style="list-style-type: none"> • Place the horizontal tube(8) through hole in the wall, slide the flange(9) along the tube until they reaches the wall to fit. • Slide the flange(3) along the vertical tube(2) and insert the sealing washer(1). Screw the flange(3) to the bottom of the waste(not supplied). • Slide the vertical tube(2) through the flange(4) and into the bottle trap body(5). Adjust to the required length to connect with the horizontal tube(8) and then fasten the joint with the nut(7) until the position is secured. • Check all the joints for leaks. <p>Note: Ensure the tube must be inserted at least 25mm inside both the outlet of bottle trap and drain stub-out.</p>
