ELECTRIC DRILL

SCREWDRIVER

HAMMER

8mm DRILL BIT

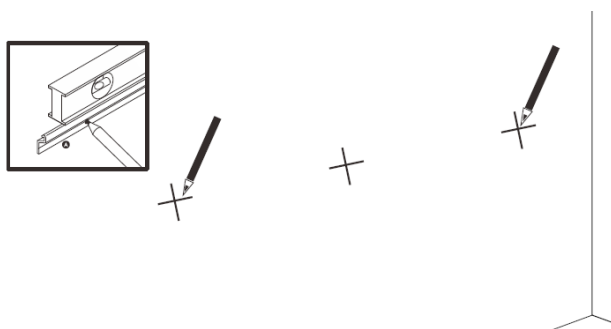

PENCIL

# Installation (drawings for illustration purposed only)

The mirror is supplied with a hanging bar to mount the mirror onto the wall. At the back of the mirror there is a corresponding bar which is designed to slot onto hanging bar. Before attempting installation, the mirror should be unpacked and inspected for signs of damage.

1. Choose the desired position of the mirror and from that determine the required position of the hanging bar.
2. Hold the hanging bar in position, using a spirit level to ensure it is level.

3. Use a pencil to mark the position of the 3 holes.
4. Place the hanging bar to one side, and drill the holes with an 8mm drill bit suitable for the type of wall.

5. Insert wall plugs into the holes, ensuring they are flush to the wall.

6. Place the hanging bar back onto the wall, lining up the 3 holes with the wall plugs.

7. Secure the hanging bar to the wall using the supplied screws.

8. You will now be able to hang the mirror. Carefully lower the mirror onto the hanging bar, ensuring that it is secure and will not slide.

# CLEANING AND MAINTENANCE

Never use products containing bleach or abrasive cleaners, as these will have a detrimental effect on the appearance and lifespan of the product. Use a clean micro fiber cloth to clean the mirror.
